

Your AI journey starts here.

Scaling Humans with Artificial Intelligence

With thirty years of proven experience as a leading federal IT company, innovation is part of our DNA.

NCI's AI solution, **Shai**, automates repetitive, high-volume tasks by working with the systems and tools you already have in place. Shai offers never-before-seen efficiencies, dependability, accuracy and cost savings to organizations – which empowers workforces to scale and reach their human potential.

This is just one way NCI is transforming government by bringing commercial innovation to missions of national importance.

- Works 24/7/365
- Operates in secure environments
- Seamlessly uses existing tools
- Flexible infrastructure options
- 100% coded in the U.S.A.

The foundation for a successful AI partnership relies upon a superior product coupled with an agile, dedicated government contractor.
